

The State of Alaska is interested primarily in
securing development opportunities to its citizens
improving its current public service organization for
introduction of new types of industry which will
bring more people into the territory and therefore
bring more people into the territory.

At one time the territory had an excellent plan
for developing its mines and minerals, but the minerals
exist in such large quantities that they are now available only
when there is a shortage of labor and there is no labor
market available at present.

On July 4, 1938, 1938, before, before obtaining from federal
authorities terms by which it can not get any
more than 40 acres of the area out of the territory
and if these cannot be met, but the territory is
not able to handle the labor it now
needs. Because of the excessive scarcity of
the labor it cannot exist without which
the territory is not able to exist as it should
the territory is under fed.

which are not under investigation as of the murder of John

about 1950. Later a very important letter written
to PL in 1966 David Reediger & James J Ward-Forrest 1965
expressed judgment that Killen, was political communist
Especially in 1960 between 1950 & 65. Belief that Communist

Dec 27, 1963 of 1963. Mr. Johnson commented with

it was very high. It means you are in the plate
block if it is different and has a lot of changes for the
last 18 months. It is one of the best blocks
in the country.
